

Hydroswing introduces the AGD. A few of the benefits include: unequaled seal system with hydraulics automatically locking the door; no pulleys, belts, straps or cables to maintain; no tracks to clean; increased accessibility on replacements (vs. bifold); decreased cost for new build (vs. bifold). Booth 1201.

Hypro introduces the New 3" Poly Transfer Pump. Achieve the highest performance available in a 3" poly transfer pump (up to 440 GPM) with the highest efficiency and horsepower on the market. Ideal for nursetank transfer and other closed system applications, this pump was specifically designed to work with 9 and 13 HP PowerPro engines and will fit on standard SAE j609a flanged engines between 8 and 18 HP. The polypropylene housing and EPDM elastomers protect the pump from most chemicals and corrosive environments. Booth 203.

Johnson Mfg., Inc. has a complete line of HyGrade Graders to choose from. HyGrade Graders come in 8' to 16' widths and complete with box scraper ends; weight box and cement weight; all hydraulic cylinders, hoses, and tips; and replaceable high carbon steel cutting edges. Booth 2111.

The Landoll VTplus was developed with input from producers. A few of the points that the Landoll VTplus was designed to address was anchoring residue, working at shallower depths, mixing more soil, having better weed kill, and the ability to level small ruts left by the previous operation. The gangs on the VTplus are set at a predetermined 10 degree angle. Available in 23' - 33' working widths. Booth 3118.

Kuhn N.A. introduces the Round (RW) and Square (SW) Bale Wrappers. RW round bale wrappers handle bales up to 4x5. SW square bale wrappers can wrap square bales up to 3x4 or round bales up to 5x5. They feature a low table height, which eliminates the need for an active fall damper. Booth 1801.

The ReDriven 20 kW unit is one of Harness Nature's most popular selling wind turbine systems for agricultural applications. It produces 20,000 watts per hour at approximately 22 mph. ReDriven turbines carry a 5 year warranty on everything...blades, controllers, turbine head, etc., and are among the quietest in the small wind industry. Other sizes available include 5 kW, 10 kW and 50 kW models. All models have the capability to connect to the grid for net metering. Booth 182.
