

Farm Works has introduced their latest version of software called Farm Works Version 2010. Some of the major additions include support for Google Map imagery, bank statement data import, rainfall and irrigation reports for water management, map animation tool and enhancements in soil sampling. The scouting imagery tool allows scouts to streamline the process of capturing digital pictures of weeds, insects, and other problems along with their GPS location from the field to the office. Booth 339.

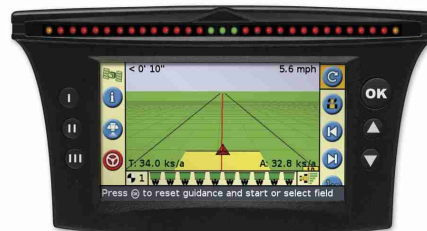

Gehl introduces the V270 Skid Loader. It features a powerful 84 horsepower Yanmar turbo-diesel engine and a rated operating capacity of 2,700 lbs. It achieves vertical lift with a state-of-the-art lift arm design that provides extended reach and lift height for easy truck and material loading. With more than 130 inches of lift height, this loader lifts higher than any competitor in its weight class. Booth 3132.

Fast Distributing is pleased to announce that it's 9500 and 9600 pull type sprayers along with the 94FM front mount and 963P 3-point sprayer models will now have stainless steel wet booms as a standard feature along with a newly designed breakaway. Fast still offers the customer the choice of 15, 20, or 22 inch nozzle body spacing as part of the standard wet boom. Booth 2460.

The VB 2160 and 2190 variable chamber round balers are new to Kuhn, but our crop packaging division has been the leader in baling technology for over 25 years. The 2160 is a 4x5 baler and the 2190 produces 4x6 round bales. Both models are available with an open throat intake design, an OptiFeed non-cutting rotor or a 14-knife Opticut integral rotor. Booth 1801.

The Trimble Field-IQ™ crop input control system is designed to offer farmers a variety of ways to control their inputs by using the Trimble® AgGPS® FmX™ integrated display or the AgGPS EZ-Guide® 500 lightbar system. The Field-IQ system combines input control capabilities into one comprehensive, modular system, including map-based planter row unit shutoff for seed and liquid fertilizer, variable rate seeding, variable rate liquid fertilizer, variable rate spreading and real-time variable rate nitrogen application. Booth 136.

Fontanelle Hybrids introduces new products for 2010. They are: Genuity™ Roundup Ready® 2 Yield soybeans, Genuity™ VT Triple PRO corn and Genuity™ SmartStax™ corn. Booth 4005.
