

The Dawn Equipment 6000 is a whole new class of toolbar-mounted, heavy-duty, multi-seasonal fertilizer coulters that is particularly suited to current cornbelt weather and tillage conditions. It can be used for fall post harvest application, spring pre-plant application and summer side dress application in conventional to very heavy residue conditions. Booth 242.

Bo-Jac Seed Company is expanding their LibertyLink soybean lineup from one variety in 2009 to four or more for 2010. In keeping with its commitment to offer customers multiple choices to enhance their profitability, Bo-Jac will have several LibertyLink soybean varieties in its Mavrick brand for 2010 planting. 9298LL (2.9), 9326LL (3.2), 8357LL (3.5), and 9386LL (3.8). Booth 3604.

Ace Pump Corporation introduces the new Ace 750 MAX Series pump. Oasis WetSeal Technology™ prevents run dry and abrasive seal failures. Oversized bearings, e-coated castings, 4000 psi hydraulic motor, and slower operating speeds also contribute to exceptional reliability. A maximum pressure of 150 psi and a maximum flow of 290 gpm satisfy today's most demanding application requirements. Booth 320.

Bakers Group Legris Transair's Blue Pipe Solutions for Compressed Air. Aluminum piping system has push-to-connect fittings and eliminates corrosion and airflow restrictions. Booth 4027.

New 5th Wheel bio-based, biodegradable product is made from soy and corn by-products. It is produced in Clarksville, Iowa by Creative Composites and is sold by Bolhuis Enterprise. It is available in 10 oz. tubes with 12 tubes per case. Booth 179.
